WORK EXPERIENCE

Geospatially Africa Podcast

Host (Media and Communication)

Uyo/Remote, NG

July 2021 – Present

- I conduct extensive research into trailblazing initiatives, talents and innovations who are optimally harnessing the power of geospatial to address germane issues plaguing the continent, thereby inspiring others to do the same.
- Host and actively contribute to every episode from guest contacting to pre and post production using recording and editing suits Kdenlive and Zencaster.
- Build and maintain relationships with innovators within the space, bringing them on board to discuss their work and its impact.
- Leverage virtual communication skills to establish rapport right from the initial contact to the launch of each episode, thereby ensuring a 98% success rate in this process with guests.

Geohazard Risk Mapping Initiative (GRMI)

Volunteer GIS Analyst / Team Lead (Research and Innovation)

Abuja/Remote, NG

September 2020 - Present

- Using QGIS and ArcGIS Suite, I have since contributed to the development of 10+ high-resolution local flood hazard maps, leveraging open source and proprietary RS data such as Copernicus, USGS data among others.
- Create reports and visualizations on Tableau, Power BI to effectively communicate findings to stakeholders
- I organize training of relevant stakeholders, emergency institutions, and decision-makers on the developed GIS floods management tools and analysis process.
- Became Team lead of R&I department in May 2021, where I work to improve the efficiency and accuracy of our mapping processes, by introducing modern and state-of-the art methods and organizing training to implement them across the volunteer structure.

DASS Geospatial Services

Geospatial Data Analyst (RTM Team)

Ikeja, LAG

October 2019 – April 2022

- Developed and implemented GIS enabled workflows to effectively manage clients Sales and output logistics activities, reducing average processing times by hours.
- Introduced cost effective Free and open source software (QGIS) and SQL to make map making and data analysis work flows +65% more efficient.
- Collaborated with senior management to train my contemporaries on these new methods, thereby significantly increasing their efficiency.
- Prior to this role, I worked for 1 year and 8 months with DASS as a Human Resources Business Partner. However, I was able to transition to Geospatial data science as a testament to my capabilities as a GIS analyst, skills developed during my undergraduate and sharpened during the COVID-19pandemic.

LEADERSHIP EXPERIENCE

Women+ In Geospatial

Regional Ambassador

London/Remote , UK

February 2022 – Present

- Coordinated 2 events with team members and partner organizations addressing new trends in the African geospatial space, aimed at uniting the community and inspiring members and potential members to join. Both events garnered 200+ participants and 1000+ view so far on Youtube.

Mentorship Coordinator

October 2021 – Present

- As a way to give back after myself being mentored in the 2nd cohort, I work to support and guide the mentoring groups through the programme, ensuring they have a seamless and mutually beneficial experience.

EDUCATION

Udacity

[Programming for Data Science with Python](#)

Lagos, Nigeria

Graduation Date: May 2022

- SQL, Python Programming, Version Control [Credential](#)

University of Ibadan

BSc in Geography (GPA: 5.3/7.0)

Ibadan, Nigeria

Graduation Date: December 2015

- Extracurricular: SRC, Electoral Commission, Man O'War

SKILLS & INTERESTS

Skills: Microsoft Office (Excel, PowerPoint) | QGIS | ARCGIS Suite | Tableau | PowerBI | GEE

Interests: GIS, Environmental Sustainability, Data Science, Analytics, Mentoring, Volunteering
